SUMMARY

Software Developer with **3 years** of professional experience working with **German and US clients** in the automobile, health and E-commerce industries. I specialise in developing robust, user-friendly, and scalable applications, combining technical expertise with a client-focused approach to deliver impactful solutions.

SKILLS

- **Programming Languages : Javascript, Python and Java** Have hands on experience in JavaScript, Python and solid knowledge of Java
- **Frontend Frameworks** : React, Angular, NextJS and Hydrogen
- **CSS Frameworks** : Tailwind, Shadcn, MaterialUI, Bootstrap, ChakraUI, Ionic
- **Backend Frameworks** : NodeJS, ExpressJS, NestJS, Flask and Spring Boot
- **Mobile Frameworks** : React Native, Expo and Capacitor
- **Database** : PostgreSQL, Mongo DB, SQLite, Redis, Vector DB , Pinecone DB and Chroma DB
- **Tools & Platforms** : AWS EC2, S3, CI/CD, GitHub Actions, SendGrid, Docker, Postman, Git , GitHub, GitLab, Bitbucket, Swagger, Slack, Jira, Google Cloud, Google AppScript, Google Play Console, Shopify, WordPress, Visual Studio Code, IntelliJ Idea.
- **Other Libraries/Packages** : LangChain, TensorFlow, Prisma, Axios, Formik, SwiperJS, Zod, Valtio, i18next, Stripe Payments

PROFESSIONAL EXPERIENCE

7 Dots Smart Solutions

Dec 2022 – Aug 2025

Full Stack Developer

- Developed and maintained end-to-end web and mobile applications using React, Next.js, Angular, React Native, ensuring responsive design and high performance.
 - Built and optimized REST APIs & microservices with Node.js (Express.js), Python (FastAPI), and Java (Spring Boot), improving scalability and system reliability.
 - Designed and managed databases with MongoDB and PostgreSQL, focusing on schema design, query optimization, and performance tuning.
 - Optimized Angular and React applications, reducing web page load time by 43% and improving user experience.
 - Deployed and maintained applications on cloud infrastructure, integrating authentication, security best practices, and CI/CD pipelines.
 - Collaborated with cross-functional teams to deliver client solutions across automobile, healthcare, and e-commerce domains.
 - Contributed across the stack from frontend UI/UX to backend business logic, demonstrating adaptability in diverse tech environments.
-

PROJECTS

DiskBabu – Video Hosting & Streaming Platform

Full Stack Project | React, Node.js, Express, MongoDB, React Native, Cloudflare R2, AWS EC2, Firebase Auth

- Built a scalable video hosting platform with a responsive web frontend ([Frontend Repo](#)) using React + TailwindCSS.
- Developed a backend service ([Backend Repo](#)) with Node.js, Express, MongoDB, and JWT authentication, enabling secure video upload, analytics, and content management.
- Integrated Cloudflare R2 for video storage and Cloudflare CDN for low-latency streaming, ensuring cost-efficient and scalable delivery.
- Deployed backend services on AWS EC2 for high availability and performance.
- Implemented Firebase Authentication for secure user sign-in and account management.
- Built a React Native mobile app ([Mobile Repo](#)) to stream hosted videos with smooth playback on both Android & iOS.
- Added advanced features like OG link sharing, branding options, revenue analytics, and daily payout system for creators.

EventsHub – Event Management Mobile App | Github

React Native (Expo), JavaScript, TypeScript, NodeJS, Mongo DB, REST APIs

- Developed a cross-platform mobile app (React Native, Expo) for event discovery, ticketing, and management.
- Implemented secure authentication & user flows (signup, login, verification) using **Firebase Authentication**.
- Built reusable UI components (buttons, inputs, search bar, pagination, image picker) with TypeScript + React Native.
- Created event & ticket management features (event creation, ticket purchase, QR-based ticket details) powered by REST APIs.
- Integrated **AWS S3** for storing files and images, and deployed backend services on **AWS EC2** for scalability.

Custom AI with LangChain & Pinecone | GitHub

NodeJS, LangChain, Pinecone, FastAPI, OpenAI API, Docker

- Built an AI-powered application using LangChain and Pinecone for semantic search and retrieval-augmented generation (RAG).
- Integrated OpenAI embeddings with vector database indexing to enable context-aware conversational responses.
- Designed modular architecture for scalable chatbot applications with Node, FastAPI, and Pinecone.
- Implemented document ingestion pipeline for PDFs and structured data, supporting intelligent query responses.

EDUCATION & CERTIFICATIONS

MSc Computer Science (Software Engineering)

Sept 2025 – Aug 2026

The National University of Ireland, Maynooth

Modules: Requirements engineering & system design, advanced concepts in object-oriented programming, practical cryptography, databases, rigorous software process, the mathematics & theory of computer science, software testing, interaction design, internet solutions engineering, project

Bachelors in Computer Science and Engineering

Nov 2020 – Apr 2024

sri venkateswara college of engineering kadapa

Main Modules: Python , DBMS , Data Structures, Operating System, Web development, Networking and Design Analysis and Algorithm
